Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 164-171, 173-176, 349-352 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ansarinia (6526318) in view of Zabara (5025807).

Ansarinia teaches that the SPG, along with other structures, can be stimulated, see abstract. Col. 7, lines 53+ teach that RF signals can be used to control the stimulation via the implanted electrodes. Col. 8, lines 15-19 teach the various parameters that can be used to stimulate. The control device of Ansarinia can configure the current as described in applicant's claim 1, if desired by the user. Thus, structurally, the control device anticipates the claimed control unit of applicant. Although Ansarinia teaches the use of implanted electrodes and a control unit, the specifics of the elongated support member of applicant's claims are not explicitly mentioned. Zabara teaches the use of an elongated member connected to electrodes on one end and a receiver on the other end, see figure 2. The Zabara device is also used to treat epilepsy, as is the device of Ansarinia. To make the elongated member of Zabara just one member, and not two, is considered to be a design choice; figures 4 and 5 show the elongated member to be a solid singular member. Further, the dimensions for the elongated member, set forth in applicant's claim 1, are considered to be obvious design choices. The

Art Unit: 3762

skilled artisan is expected to shape and modify the dimensions of an implant to fit the particular patient. Also, the subject matter of claims 171,349-352 is considered to be intended use, not a structural limitation.

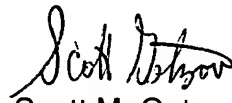

Allowable Subject Matter

3. Claim 172 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 289,334-348 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.
